49. Developed successful grant applications like: Punjab Integrated PHC Model Program Rs. 3.37 billion from Government of Punjab; Health Education and Services through Community Participation US\$ 6.5 million from Bill and Melinda Gates Foundation, etc.

50. Developed numerous monitoring systems, study tools, training materials, curricula, etc.

CAREER SYNOPSIS

Development Strategies, Pakistan **Founder and Chief Executive**

Nov 2010 – Present

Development Strategies is established by group of health and development professionals as consulting firm to provide services to organizations working in the field of health, education, community development, etc.

National Commission for Human Development (NCHD), Sept 2002 – April 2011

Director Health Programs October 2005 – April 2011 (From Nov 2010-April 2011 - 3 days a week)

Chief PHC & Senior General Manager, Health Programs Sep 2002 – Oct 2005

National Commission for Human Development (NCHD) was setup in June 2002 by the President of Pakistan to promote human development through improving health, education, and economic indicators of the country. The prime focus of NCHD is to provide technical assistance to government to improve government delivery systems through restructuring, capacity building, and gap-filling.

Based upon record of accomplishment, was brought on board in 2002 to: lead NCHD health team at national level to conceive, design, plan and implement health programs (with prime focus on system's strengthening, MNCH, Family Planning / Birth Spacing and PHC) for provincial and district governments on behalf of NCHD

- Conceived, planned, implemented, and managed health programs including PHC Extension (MNCH, PHC and Family Planning), School Health Program (Primary school students), National ORS Campaign (MNCH), Punjab Integrated PHC Model Program (System's restructuring and strengthening), etc.;
- Developed detailed implementation plans, monitoring, reporting and evaluation systems for district, provincial and national tiers;
- Developed terms of reference (MoU) for provincial and district government;
- Developed community development and health education modules for field workers on various health and development interventions (child spacing, infectious disease prevention, growth

- monitoring, maternal care, community organization and development, etc.);
- Developed number of successful grant proposals and obtained funding;
- Represented NCHD at national and international forum.

APPNA SEHAT, Pakistan Sept 1993 – Sept 2002

Country Director April 1999 to Sep 2002

Program Manager Sept 1996 to April 1999

Regional Director Sep 1993 to Sep 1996

APPNA SEHAT is subsidiary of APPNA i.e., Association of Pakistani Physicians of North America and registered in Pakistan as non-governmental organization working in health and development in rural communities in ten districts of Pakistan since 1989. Its primary health care program has been successful in significantly reducing maternal and infant mortality (from 600 to 73 and 120 to 27 respectively), and population growth rate (3.7 to 1.4) through health education and community development interventions focused on MNCH, Family Planning, Infectious Disease Prevention, Nutrition, Hygiene and Sanitation. This primary health care program has nearly 300 regular employees throughout the country.

Selected to lead APPNA SEHAT team at regional and then was promoted to lead at national level with the responsibilities to successfully implement APPNA SEHAT primary health care and development program, coordinate with government & non-government organizations and to prepare grant proposals for funding.

- Provided leadership to the regional and national implementation teams for successful implementation;
- Prepared organizational budgets and managed financial and human resources;
- Developed and successfully implemented a community development model ensuring maximal representation from entire community. The success of this model was based upon its inbuilt element of accountability within the community organizations;
- Developed baseline health census, reporting and monitoring tools;
- Developed training modules and conducted trainings of the field staff on project interventions;
- Facilitated numerous self-help-based community development initiatives including establishment of sewing schools, establishment of water schemes for villages, cleaning of village ponds and drainage systems, building of school walls, construction of latrines for schools, etc.;
- Prepared successful grant proposals.

King Edward Medical College, Lahore Nov 1990–Sept 1993

Demonstrator, Pharmacology

As demonstrator at King Edwards Medical College Lahore Pakistan, worked in a team headed by professor which imparted lecture and laboratory-work based pharmacology training to MBBS and BDS students and conducted pharmacological research activities.

Government of Punjab, Health Department Sep 1985–Oct 1990

Medical Officer

Selected as medical officer and worked at primary healthcare facilities (one Basic Health Unit and two Rural Health Centers) in rural areas of Khushab and Bhakkar districts. My role was to:

- Manage health facilities' resources;
- Manage outpatients, inpatients, and emergencies;
- Supervise primary health initiatives of the government like EPI, malaria control, etc.;
- Conduct training of the staff and produced reports.

EDUCATION

Health Services Academy, Quaid-e-Azam University, Islamabad 1999

MPH (Master's in Public Health)

Nishtar Medical College, Multan 1985

MBBS (Bachelor of Medicine & Bachelor of Surgery)
